COMPREHENSIVE CLINICAL ASSESSMENT

Patient ID 45f6c6e54bbf

Assessment Date 2025-07-21

Data Source REAL CLINICAL DATA

Total Assessments Reviewed 58

RISK STRATIFICATION

Overall Risk Level HIGH

Composite Risk Score 60/100

CLINICAL PRIORITIES

HIGH PRIORITY (Immediate Attention)

- Moderate PTSD Checklist symptoms requiring intervention (50/80)
- Moderate Anxiety Disorder Scale symptoms requiring intervention (15/21)

MEDIUM PRIORITY (Active Monitoring)

- Mild Depression Inventory requiring ongoing support (2/27)
- Mild Impairment Functional Assessment requiring ongoing support (6/48)

LOW PRIORITY (Maintenance)

- Emotion Regulation within manageable range (83/180)

CLINICAL RECOMMENDATIONS

- **Immediate:** **Priority interventions for high-severity assessments**
- **Short-term:** Increase therapy frequency for elevated scores
- **Ongoing:** **Regular monitoring of moderate-severity symptoms**
- **Follow-up:** Complete reassessment in 4 weeks
- **Referral:** Consider specialist consultation as indicated
